

Nickelback / Photograph - Chords Lesson (just the chord shapes)

Indicates
the fret
number

X = Do not play string

O = Play string open

Shown above are just the main chords used in the song. These chord shapes have a unique sound to them (they almost sound like they have a "chorus" effect on them). Adding an effect like "chorus" on these chord shapes can really bring out the open strings and tones.

Note: If you are planning to play along with the song you will need to tune down a half step or use a guitar trainer that has a "key" feature on it (allows you to change keys easily).
