

Major Pentatonic Scales – shown in all 5 positions...

The “Major Pentatonic” Scale use 5 notes (A, B, C#, E, F#). As you will notice the “Major Pentatonic” scales look like the “Minor Pentatonic” scales – with the only difference being that the Major Pentatonic scales start on different frets. Same scales at new locations, but will sound differently when played.

Major Pentatonic Scales

* Use with Major, and Major 7th/6th/9th/13th chords (Country / Southern Rock, and Jazz chord progressions).

Picking Sequence:

It is suggested to “alternate” picking (using Down / Up picking) when practicing any of these scales (this will help develop coordination and speed between your right and left hands).
